

Avinash Bachhav

Full Stack Java Developer

Email: avinashbachhav67@gmail.com | **Phone:** +91 8669173701 | [LinkedIn](#) | [GitHub](#)
Pune, India

Professional Summary

Full Stack Java Developer with hands-on experience in Core Java, Spring Boot, REST APIs, JPA/Hibernate, JDBC, SQL, MySQL, and Microservices. Developed and tested 15+ RESTful APIs and backend applications involving database connectivity, CRUD operations, API testing, debugging, and troubleshooting. Strong foundation in Object-Oriented Programming, Collections, Exception Handling, Multithreading, backend application development, RESTful services, and relational database concepts. Experienced with Git, Maven, Docker, and Postman.

Professional Training

Profound Edutech Pvt. Ltd., Pune

2025 – 2026

- Developed 15+ RESTful APIs using Core Java, Spring Boot, JPA/Hibernate, and MySQL.
- Built backend functionality for CRUD operations, database connectivity, and REST API implementation.
- Worked with microservices-based applications and REST-based service communication.
- Implemented and tested REST endpoints using Postman, handling API request/response processing.
- Wrote SQL queries and performed database operations using MySQL; debugged application, API, and database-related issues.
- Followed layered backend architecture using Controller, Service, and Repository components.

Projects

Hospital Management System

May 2025 – Present

Tech Stack: Spring Boot, JPA/Hibernate, MySQL, REST APIs, Docker

- Developed 16+ REST APIs for managing patients, doctors, hospitals, and appointments.
- Implemented CRUD operations using Spring Boot and JPA/Hibernate.
- Designed backend components using Controller-Service-Repository architecture.
- Implemented relational database operations and entity relationships using JPA/Hibernate and MySQL.
- Developed authentication and session management functionality for secure application access.
- Tested and debugged REST APIs using Postman and Dockerized the application for consistent deployment.

E-Commerce Website

Jan 2026 – Present

Tech Stack: Spring Boot, React, JPA/Hibernate, MySQL, JWT, Docker

- Developed a full-stack e-commerce application with 20+ REST APIs for products, cart, orders, and admin operations.
- Implemented backend services using Spring Boot, JPA/Hibernate, and MySQL.
- Designed normalized relational database schemas and entity relationships.
- Implemented JWT-based authentication and role-based access control.
- Integrated React frontend components with backend REST APIs.
- Used Docker for containerizing the Spring Boot and MySQL environment and deployed it on Railway.app for live testing.

Education

Bachelor of Computer Science

2022 – 2025

M.S.G College, Malegaon – **CGPA:** 7.10/10

Skills

Programming Languages: Java, SQL.

Core Java: OOP, Collections, Exception Handling, Streams, Multithreading.

Backend Development: Spring Boot, Spring MVC, REST APIs, JPA, Hibernate, JDBC, Servlets, Microservices.

Database: PostgreSQL, MySQL, SQL, Relational Database Concepts.

Tools and Platforms: Git, GitHub, Maven, Postman, IntelliJ IDEA, Eclipse, Docker, Linux, Windows, Swagger UI.

Frontend: React.js, HTML, CSS, JavaScript, Bootstrap.
